

# WHO WE ARE

## ABOUT US

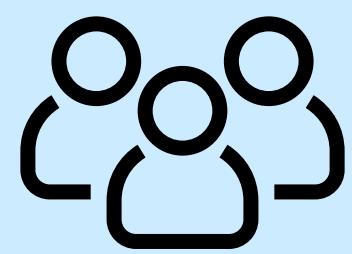

We are an interdisciplinary team of Duke University engineers passionate about robotics.

We compete annually in RoboSub: A competition that challenges teams to develop autonomous underwater vehicles to navigate complex environments and complete tasks. We have participated since our founding in 2001 and, after a brief hiatus during Covid, restarted in 2021

## CORE VALUES

Apply and contribute towards advancements in robotics

Foster an interdisciplinary and supportive community of dedicated problem-solvers

Cultivate technical skills through real-world projects
